

Q3 Product and Community Insights

I'm Sean Fitzpatrick, Co-Founder of docuflow for SAP. At VersaFile, we remain committed to helping organizations streamline and automate content management across SAP and other enterprise applications—driving deeper integration, improved efficiency, and real business outcomes.

This quarter, we're excited to share several new product capabilities, highlighted below, along with a customer spotlight on Equinor.

Thank you for your continued trust. **We stand by our commitment to deliver measurable value to your organization—even if it costs us.** As always, we'd love to hear how things are going with docuflow and how we can better support your success.

Sean Fitzpatrick

New in docuflow

Here's what we've rolled out this quarter to help you get more from your SAP and content systems:

■ ■ Smarter Caching

Achieve faster content access with intelligent data caching in both single-node and distributed environments.

■ SharePoint Managed Metadata

Utilize SharePoint Term Sets with bidirectional metadata updates for richer, more organized content.

■ ■ SharePoint Optimizations

Experience significantly improved performance on document queries within SharePoint environments.

■ enChoice Encore Support

We've added enChoice Encore as a newly certified repository for all your SAP Content needs.

■ Docker & Kubernetes Ready

Fully compatible with containerized deployments for streamlined, modern IT operations.

■ Expanded CMIS Support

Full CMIS support now available for the IBM CP4BA platform on S/4HANA Private and Public.

Customer Spotlight

Equinor — Norway's Largest Energy Company

docuflow modernized SAP attachment and data archiving at **Equinor**, Norway's largest energy company. In just 90 days, the team migrated over **200 SAP repositories** and transitioned Equinor's SAP archiving to the cloud—with **zero disruption for 30,000 users**.

Key Wins:

- Migrated from on-prem to SaaS, aligning with corporate strategy and cutting costs
- Zero user disruption, reducing change management effort
- Clean Core readiness for S/4HANA migration

Use Case of the Quarter

Streamlining HR Content with SuccessFactors + docuflow

Managing HR documents across multiple systems and geographies can be messy, manual, and inefficient. Many organizations struggle with limited document management capabilities in SuccessFactors—leading to scattered files, frustrated managers, and compliance risks.

The Challenge: SuccessFactors alone doesn't offer strong filing, tagging, or secure document access—making everyday HR tasks tedious and error-prone.

How docuflow Helps:

- Centralized Content Management
- Automates folder creation and metadata tagging
- Provides secure, role-based access to documents
- Works natively inside SuccessFactors

The Outcome: HR content is centralized, compliant, and easily accessible. Employees, managers, and HR teams enjoy a streamlined, secure experience—saving time and reducing risk.
